PROFESSIONAL PROFILE

Software engineer with **8+ years of experience** in full-stack development and **2 years leading as Product Owner**, specialized in delivering scalable digital products across **AgriTech, LegalTech, and enterprise administration** sectors. **Hybrid technical-strategic profile** with a proven track record managing cross-functional teams, defining roadmaps, and translating business needs into high-impact solutions. **PMI-certified (PMBOK 2025)**, with solid command of Scrum, Kanban, and stakeholder management. **2 years of hands-on experience applying Artificial Intelligence tools** to software development workflows. Delivered projects for enterprise clients including *Home Depot, Ernst & Young, and Viva Aerobus*.

WORK EXPERIENCE

Product Owner & Senior Full-Stack Developer

2021 – Present

Canicalabs · Software product company

Current role · 5 years

- Led as **Product Owner** the product strategy, roadmap definition, and backlog prioritization for web and mobile solutions in the AgriTech and administrative sectors, collaborating with clients such as **Alis, Allfruits, Avoking, and Frutcom**.
- Contributed as **full-stack developer** on projects for **UnityCFDI, Inbolt, and LegaxTechPro**, implementing backend and frontend modules using .NET Core, Blazor, and ASP.NET Zero.
- Led as PO a team of **3 developers**; facilitated full Scrum ceremonies — sprint planning, refinement, review, and retrospectives — achieving greater delivery predictability and a **~30% reduction in delivery cycle time** through clear DoD and acceptance criteria definitions.
- Key project — Alis**: software product featuring a **facial recognition analysis module** built with **Emgu CV**, applied to the agricultural sector for field personnel identification and access control.
- Designed full-stack architectures with **.NET Core, Blazor, and ASP.NET Zero**; built a reusable component library that **reduced new module development time by ~40%** and improved UI consistency.
- Developed cross-platform mobile applications (iOS & Android) using **Xamarin and .NET MAUI**, extending product coverage to mobile channels and broadening clients' commercial reach.
- Managed SQL Server and Oracle databases as DBA; optimized critical agricultural traceability queries achieving a **60% performance improvement** on high-volume reports.
- Have been using **Artificial Intelligence** tools (including **Claude by Anthropic**) for 2 years to support development workflows: code generation, technical review, and requirements analysis.

IT Manager & Freelance Software Developer

2019 – 2021

Mix.Coworking · UPA Construcción · Vazgo Administración · Own projects

2 years · simultaneous roles

- Managed IT infrastructure and technology operations for **3 organizations simultaneously**, ensuring system continuity and operational availability.
- Implemented custom technology solutions that **reduced IT response times by ~50%** through structured support protocols and internal process optimization.
- Concurrently developed full-stack web platforms (frontend + backend + CMS) as a freelancer for coaching sector clients: *Luis Topete Success, Action Coach, Marily Torres*.

Software Developer

2016 – 2019

Codelab — LegalTracking

2½ years

- Developed and supported web software modules for **LegalTracking**, a B2B SaaS platform for fiscal and administrative management used by law firms.
- Delivered custom implementations for high-profile enterprise clients: **Home Depot, Ernst & Young, Viva Aerobus, and Sevin & Asociados**, consistently on time and within defined scope.
- Automated administrative processes through custom system integrations, **reducing document processing time by ~35%** across client organizations.

LANGUAGES

Spanish

Native

English

Advanced (B2)

- Coordinated with PMs and end users for requirements gathering, change control, and deliverable validation under strict deadlines.

Developer — Credit Bureau Integration Project

Banca Libertad

2016

2 months

- Collaborated in the development of integration modules with the **Mexican Credit Bureau (Buró de Crédito)** within the financial sector, implementing credit data query and validation flows.

EDUCATION & CERTIFICATIONS

Diploma in Project Management Professional

Project Management Institute (PMI) · PMBOK Guide · 2025

Project management, risk management, stakeholder engagement, strategic planning, and quality control under international PMI standards. Framework applicable to agile and hybrid environments.

B.S. in Cybernetics and Computer Systems Engineering

· Graduated

2011 – 2015

Universidad La Salle · Pachuca
